The Ship We Built Aug 27 2022 Tender and wise, *The Ship We Built* is about the bravery it takes to stand up for yourself—even to those you love—and the power of finding someone who treasures you for everything you are. Sometimes I have trouble filling out tests when the name part feels like a test too. . . . When I write letters, I love that you have to read all of my thoughts and stories before I say any name at all. You have to make it to the very end to know. Rowan has too many secrets to write down in the pages of a diary. And if he did, he wouldn't want anyone he knows to read them. He understands who he is and what he likes, but it's not safe for others to find out. Now the kids at school say Rowan's too different to spend time with. He's not the "right kind" of girl, and he's not the "right kind" of boy. His mom ignores him. And at night, his dad hurts him in ways he's not ready to talk about yet. But Rowan discovers another way to share his secrets: letters. Letters he attaches to balloons and releases into the universe, hoping someone new will read them and understand. But when he befriends a classmate who knows what it's like to be lonely and scared, even at home, Rowan realizes that there might already be a person he can trust right by his side. "Incredibly good; by turns raw, sweet, horrifying, tender, and hopeful." —Laurie Halse Anderson, NYT bestselling and award-winning author of *Speak* and *SHOUT*

The Bride Test Dec 19 2021 From the USA Today bestselling author of *The Kiss Quotient* comes a romantic novel about love that crosses international borders and all boundaries of the heart... When he steadfastly avoids relationships, his mother takes matters into her own hands and returns to Vietnam to find him the perfect bride. As a mixed-race girl living in the slums of Ho Chi Minh City, Esme Tran has always felt out of place. When the opportunity arises to come to America and meet a potential husband, she can't turn it down, thinking this could be the break her family needs. Seducing Khai, however, doesn't go as planned. Esme's lessons in love seem to be working...but only on herself. She's hopelessly smitten with a man who's convinced he can never return her affection. With Esme's time in the United States dwindling, Khai is forced to understand he's been wrong all along. And there's more than one way to love.

Working-Class Environmentalism May 12 2021 This book presents a timely perspective that puts working-class people at the forefront of achieving sustainability. Bell argues that environmentalism is a class issue, and confronts some current practice, policy and research that is preventing the attainment of sustainability and a healthy environment for all. She combines two of the biggest challenges facing humanity: that millions of people around the world still do not have their social and environmental needs met (including healthy food, clean water, affordable energy, clean air); and that the earth's resources have been over-used or misused. Bell explores various solutions to these social and ecological crises and lays out an agenda for

simultaneously achieving greater well-being, equality and sustainability. The result will be an invaluable resource for practitioners and policy-makers working to achieve environmental and social justice, as well as to students and scholars across social policy, sociology, human geography, and environmental studies.

[*Viability of Seeds*](#) Mar 22 2022 From prehistoric times man has had a special relationship with seed plants - as a source of food, materials for tools, buildings, clothing and pharmaceuticals, and for ornamenting his surroundings for his own delight (probably in that chronological order which, incidentally, also gives some indication of the priorities of life). Today man's most important staple foods are derived directly from seeds as they have been since neolithic times. (It is a sobering thought, as Harlan* has pointed out, that nothing significant has been added to his diet since then.) From those times he must have learned to collect, conserve and cultivate seeds; and the accumulated experience has been handed down. This book then is part of an ancient tradition, for here we are still primarily concerned with these skills. Seeds are plant propagules comprised of embryos in which growth has been suspended, usually supplied with their own food reserves and protected by special covering layers. Typically they are relatively dry structures compared with other plant tissues and, in this condition) they are resistant to the ravages of time and their environment. But resistant is a relative term and seeds do deteriorate: the type, the extent and the rapidity of the deterioration, and the factors which control it are important to agronomists, horticulturalists, plant breeders, seedsmen, seed analysts, and those concerned with the conservation of genetic resources.

[*Homeland and Other Stories*](#) Feb 27 2020 "Extraordinarily fine. Kingsolver has a Chekhovian tenderness toward her characters. . . . Spreading her memorable characters over landscapes ranging from Northern California to the hills of eastern Kentucky and the Caribbean island of St. Lucia, Kingsolver tells stories of hope, momentary joy, and powerful endurance. In every setting, Kingsolver's distinctive voice— at times comic, but often heartrending—rings true as she explores the twin themes of family ties and the life choices one must ultimately make alone. *Homeland and Other Stories* creates a world of love and possibility that readers will want to take as their own.

St. Paul Magazine and others Here is real food—our indigenous American fruits and vegetables, the wild and foraged ingredients, game and fish. Locally sourced, seasonal, “clean” ingredients and nose-to-tail cooking are nothing new to Sean Sherman, the Oglala Lakota chef and founder of *The Sioux Chef*. In his breakout book, *The Sioux Chef's Indigenous Kitchen*, Sherman shares his approach to creating boldly seasoned foods that are vibrant, healthful, at once elegant and easy. In 1978 six refugees—a girl, her father, and four “uncles”—are pulled from the sea to begin a new life in San Diego. In the child’s imagination, the world is transmuted into an unearthly realm: she sees everything intensely, hears the distress calls of inanimate objects, and waits for her mother to join her. But life loses none of its strangeness when the family is reunited. As the girl grows, her matter-of-fact innocence eddies increasingly around opaque and ghostly traumas: the cataclysm that engulfed her homeland, the memory of a brother who drowned and, most inescapable, her father’s hopeless rage.
