Corpus Inscriptionum Arabicarum Palaestinae, Volume Four: -G- Mar 14 2022 The religious and strategic importance of Western Palestine in the Islamic period is clearly reflected in the hundreds of Arabic inscriptions found, the texts of which cover a variety of topics including construction, dedication, religious endowments, epitaphs, Qur'anic texts, prayers and invocations, all now assembled in this Corpus Inscriptionum Arabicarum Palaestinae (CIAP). The inscriptions are arranged according to site, and are studied in their respective topographical, historical and

cultural contexts. In this way the Corpus offers more than a survey of inscriptions: it represents the epigraphical angle of the geographical history of the Holy Land.

Islamic Literature in Spanish and Aljamiado Aug 07 2021 This work is a study of Islam in medieval Christian Spain, focussing on the Mudejar religious authority Yca Gidelli (fl. 1450) and his Islamic writings in Spanish. On the basis of published and unpublished sources in Spanish and Arabic, it sheds new light on the religious history of the Muslim minorities.*

The New Pillar Sep 08 2021 As Washington and Riyadh move further apart, America and the smaller Arab Gulf states of Kuwait, Qatar, Bahrain, Oman and the United Arab Emirates are moving closer together. Bringing three decades of journalistic and scholarly experience to his research, Simon Henderson takes a closer look at this important but often overlooked strategic trend.

Corpus Inscriptionum Arabicarum Palaestinae, Addendum Feb 13 2022 The squeezes of the Arabic inscriptions collected by Max van Berchem in the Middle East are presented here in a systematic way accompanied by their studies

and photographs. This is the first of hopefully two volumes which will cover all the existing squeezes in the Archives, representing many inscriptions which do no longer exist.

The Shaiqiya Mar 22 2020

The Arabs in the Mind of America Nov 10 2021

A systematic study exploring American attitudes toward Arabs through American press coverage of Middle East news. Covers the period from 1956-1985.

The Exoteric Aḥmad Ibn Idrīs Oct 29 2020 The Moroccan mystic and theologian Aḥmad b. Idrīs (1749-1837) was one of the most dynamic personalities in the Islamic world of the 19th century. Through his teachings and the activity of his students important Sufi orders were founded which exerted wide-ranging social and political influence. In the present work an Arabic edition and translation with commentary of two texts are made available which throw light on Ibn Idrīs' attitude towards the religious-dogmatic questions of his day and age.

Modern Arabic Sociolinguistics Dec 19 2019

Modern Arabic Sociolinguistics outlines and evaluates the major approaches and methods used in Arabic sociolinguistic research with respect to diglossia, codeswitching, language

variation and attitudes and social identity. This book: outlines the main research findings in these core areas and relates them to a wide range of constructs, including social context, speech communities, prestige, power, language planning, gender and religion examines two emerging areas in Arabic sociolinguistic research, internet-mediated communication and heritage speakers, in relation to globalization, language dominance and interference and language loss and maintenance analyses the interplay between the various sociolinguistic aspects and examines the complex nature of the Arabic multidialectal, multinational, and multiethnic sociolinguistic situation. Based on the author's recent fieldwork in several Arab countries this book is an essential resource for researchers and students of sociolinguistics, Arabic linguistics, and Arabic studies.

Prominent Women from Central Arabia Dec 31 2020 Women's contributions to Arabic and Islamic society - be they cultural, religious, medical, or military - have been recorded by Muslim historians throughout the ages. No biographical dictionary of any worth was considered complete unless it mentioned prominent women, a tradition stemming from the

earliest Islamic biographies which all included the female companions of the Prophet, as well as mothers of notable men. However, little has been written about the contribution of women from more recent contemporary central Arabian society. Published in association with Saudi Arabia's King Abdul Aziz Foundation for Research and Archives, Prominent Women from Central Arabia explores sources ranging from published material to manuscripts, documents, and oral history in an attempt to redress the balance. In all, the book contains 52 biographies of women who lived from the beginning of the 18th century until the death of King 'Abd al-'Aziz al-Saud in 1953. The women examined include notable poets, educators, and great donors of charitable works, amongst others. Above all, the book highlights the enormous contribution of the women of Central Arabia during the period under consideration, demonstrating that, contrary to popular misconception, their influence has in fact been highly significant.

Blood Disputes Among Bedouin and Rural Arabs in Israel Jan 20 2020 This is an analysis of dispute resolution among Bedouin and rural Arabs in Israel. The author confronts his own involvement in the process as public

administrator, anthropologist, and friend of the disputants. Traditional conflict resolution by groups of kinsmen sometimes involved bloodshed and often required payment of blood money; it was less concerned with some abstract conception of "justice" than restoration of "honor" and the reestablishment of some stable status quo between the involved groups.

Inside the Arab World Jun 24 2020 Precious oil and export markets, wars in Lebanon and the Persian Gulf, peace talks at the White House, terrorist eruptions: more now than ever, Arab affairs are the West's affair. And yet as we find ourselves increasingly enmeshed in its politics and economics, the Middle East remains a mystery to most of us, a world of dimly understood connections and impenetrable complexities. The Arab world at last becomes accessible in this book. The only study to include developments since the Gulf War and the historic pact between Israel and the PLO, Inside the Arab World gives us a complete and detailed picture of the region as it is today, as well as a clear sense of how Arab affairs have evolved and where they may lead. Despite its abundance of oil, the Arab world has failed to produce a single successful economy. Michael Field, a recognized

expert and longtime reporter on the Arab states, ably explores the cultural, political, and geographic reasons for this failure. Ranging from Algeria to the Gulf states to Egypt and Syria, he considers the fragmentation of society, the people's tolerance of bad government, corruption, and the deadening economic effect of Arab socialism. But he also shows how the region--influenced partly by exposure to Western media, partly by reforms imposed by creditors--is changing now, taking its first cautious steps toward democracy, whose opportunities so far have been most firmly grasped by Islamic fundamentalists. Timely, thorough, and highly readable, this book offers much-needed insight into the Arab world as its politics and policies increasingly engage our own.

Arabs and Young Turks Aug 19 2022 A study of Arab politics in the late Ottoman Empire as viewed from the imperial capital in Istanbul. This analytical narrative of the young Turk period (1908-1918), discusses both Arab concerns and the policies of the Ottoman government toward the Arabs

*Dictionary of African Biography Sep 20 2022
From the Pharaohs to Fanon, Dictionary of African Biography provides a comprehensive*

overview of the lives of the men and women who shaped Africa's history. Unprecedented in scale, DAB covers the whole continent from Tunisia to South Africa, from Sierra Leone to Somalia. It also encompasses the full scope of history from Queen Hatsheput of Egypt (1490-1468 BC) and Hannibal, the military commander and strategist of Carthage (243-183 BC), to Kwame Nkrumah of Ghana (1909-1972), Miriam Makeba and Nelson Mandela of South Africa (1918 -).

The Arab State Feb 01 2021 It has often been argued that Arab states are arbitrary political creations, lacking historical or present legitimacy. This book, first published in 1990, provides a different picture of 'the Arab state', drawing on historical, economic, philosophical and sociological perspectives to give a balanced and convincing view of the complex reality of contemporary Arab politics. The contributors, from the Arab countries, from Europe and the United States, investigate the roots of the nation state in the Arab world, evaluating in particular the economic bases of individual states. They discuss the evolution of Arab societies and the way this is reflected in different states, and examine the problems of domestic and international integration in the Arab context.

Original and comprehensive in its findings, this is an essential text on the fundamental political structure of the Arab world. Its interdisciplinary breadth makes possible an entirely new reading of the political reality of the Middle East.

Muhammad and the Golden Bough Jun 17 2022
The book dissects the intriguing Arab-Islamic myth built around Muhammad's unearthing of a "golden bough" from the grave of the last survivor of an ancient Arab people, the Thamud, who, according to the myth, were destroyed by a divine scourge for their iniquity. In the myth the episode of the slaying of the she-camel of the prophet Salih, which precipitates the downfall of the Thamud, is symbolically linked with Muhammad, the discoverer of the golden bough.

(Dis)forming the American Canon Jul 06 2021
Few critical studies have examined the African-American slave narratives that were written in Arabic, and none of these has seized the occasion to reconsider the problems of translation and canon formation, the relationship between literacy and reason, and the relation of Western Enlightenment reason to Arabic texts. Ronald A.T. Judy offers an alternative interpretation of

literacy that challenges the claim of traditional Enlightenment discourse that literacy and reason are the privileged properties of Western culture. Judy argues, on the basis of his readings of autobiographical African-American Arabic slave narratives, that through the production of the Arabic text, the African slave already had the necessary element that the West attributes to "reason" before his original introduction to Western culture - a literacy that already mediated between Africa and Europe. Paying careful attention to the problems of translation and canon formation, the book sets out to demonstrate how cultural values, the humanities, and Western figures of reason must be transformed, and in particular how national literary traditions must be reconstituted and globalized, in the light of current events. It includes the first published translation of the longest Arabic-language slave narrative known to exist in North America, which is said to be an autobiographical 19th-century Arabic slave narrative known as "Ben Ali's Diary".

Arabic Language and Culture Amid the Demands of Globalization Jan 24 2023 As with any other tongue, the Arabic language influences the way Arabic speakers see, judge and relate to

the world. It affects the very nature of their perceptions and judgments, and hence constitutes an integral part of a person's character and identity as an individual and, more importantly, as a member of a group and a society. Languages reflect, indeed measure, the strengths and weaknesses of civilizations as they embody the progress, the innovations and the coherence of these civilizations. The Islamic world's encounters with other civilizations, particularly the Greek civilization, presented major challenges to the intellectual evolution of Islam at the very early stages of its development as a culture. In the current era of globalization, as in the past, the Arabic language and culture have been deluged by a tremendous influx of new terminology and concepts. As cross-cultural encounters have increased globally due to astonishing developments in information technology and the fast pace with which information and knowledge are transferred to the rest of the world, the need for linguistic adjustments in Arabic is still on the rise in order to convey scientific discoveries, as well as economic and social ideas promulgated by non-Arab nations. The Arabic term for 'globalization' (al-cawlama) was coined about two decades ago

specifically to describe the impact of the new wave of socio-political and economic ideas, as well as revolutionary developments in the field of telecommunications and electronics. The crushing defeat of the Arab armies by Israel in 1967 and the occupation of Arab lands as a result of this war; the defeat of the Iraqi army by the coalition forces in 1991; US reactions to the 9/11 attacks; the US-led war on Afghanistan; the more recent occupation of Iraq; and perhaps above all the continued occupation of Palestinian lands by Israel, have contributed to fears and concerns among Arabs. Indeed, faced with unprecedented political, economic, military and cultural reverses, the Arab and Islamic worlds find themselves forced into ever deeper levels of introspection about their society and culture. It is hardly surprising that the Arab world seeks to reject globalization based on geopolitical and cultural domination and continues to insist upon an alternative approach based on mutual respect, two-way exchange (tathāquf, rather than cawlama) and the right to selectively adopt innovation. The West would do well to recognize that their best chance of gaining support for globalization from the Arabs (and likely from the rest of the Third World) lies in seeking true

partners in the endeavor, respecting the uniqueness of their partners' cultures and societies, and ensuring that a mutual exchange with Western culture and society is perceived as something worth embarking upon, rather than as something to fear.

Western Palestine is extremely rich in Arabic inscriptions, whose dates range from as early as CE 150 until modern times. Most of the inscriptions date from the Islamic period, for under Islam the country gained particular religious and strategic importance, even though it made up only part of the larger province of Syria. This historical importance is clearly reflected in the hundreds of inscriptions, the texts of which cover a variety of topics: construction, dedication, religious endowments, epitaphs, Qur'anic texts, prayers and invocations, all now assembled in the "Corpus Inscriptionum Arabicarum Palaestinae ("CIAP). The "CIAP

follows the method established at the end of last century by Max van Berchem, namely, the studying of the Arabic inscriptions 'in context'. Van Berchem managed to publish two volumes of the inscriptions from Jerusalem: the "CIAP covers the entire country. The inscriptions are arranged according to site, and are studied in their respective topographical, historical and cultural context. In this way the "CIAP offers more than a survey of inscriptions: it represents the epigraphical angle of the geographical history of the Holy Land. Volume One: A, has been published in 1997 and is still available.

*□□□□□ □□□□□ May 16 2022 Under the title *The Reformation of Morals*, the tenth-century Syrian Orthodox scholar Yahya ibn 'Adi offered encouragement to the effort to promote moral perfection, especially among kings and other members of the social elite: his tract, on the social virtues and vices, gives extensive advice about the cultivation of the former and the extirpation of the latter. Where there are many echoes of Hellenistic moral philosophy in his presentation, the topical profile of the work and the language the author uses reveal his participation in the Baghdad circle of philosophers and intellectuals—both Christian*

and Muslim—who were responsible for much that has come to be regarded as typical of the classical culture of the Islamic world. In fact, this text has occasionally been attributed to one or another famous Muslim author. It now stands as an important Christian contribution, in Arabic, to a strand of moral philosophy that is an integral component of the intellectual tradition of the world of Islam.

Thou Shalt Not Speak My Language Apr 22 2020 It has been said that the difference between a language and a dialect is that a language is a dialect with an army. Both the act of translation and bilingualism are steeped in a tension between surrender and conquest, yielding conscious and unconscious effects on language. Thou Shall Not Speak My Language explores this tension in his address of the dynamics of literary influence and canon formation within the Arabic literary tradition. As one of the Arab world's most original and provocative literary critics, Kilito challenges the reader to reexamine contemporary notions of translation, bilingualism, postcoloniality, and the

discipline of comparative literature. Wail S. Hassan's superb translation makes Thou Shalt Not Speak My Language available to an English audience for the first time, capturing the charm and elegance of the original in a chaste and seemingly effortless style.

Handbook for Arabic Language Teaching Professionals in the 21st Century Sep 27 2020 This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that

the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: Background of Arabic Language Teaching; Contexts of Arabic Language Teaching; Communicative Competence in Arabic; The Learners; Assessment; Technology Applications; Curriculum Development, Design, and Models; Arabic Language Program Administration and Management; and Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators,

graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

Alfarabi and the Foundation of Islamic Political Philosophy Dec 23 2022 Mahdi, whose research brought to light writings of Alfarabi previously known only through medieval bibliographical references, presents this great thinker as his contemporaries and followers would have seen him: as a philosopher who sought to lay the foundations for a new understanding of revealed religion and its relation to the tradition of political philosophy."

I Am You Oct 09 2021 A groundbreaking work which was first published in Beirut in the year 2000 by Riad el-Rayyes, I Am You (Ana Hiya Anti) is the only novel in Arabic which deals exclusively with the subject of female homosexuality in the Middle East. This critical translation of Elham Mansour's Lebanese novel provides a rare insight into the prevalent

attitudes towards lesbianism in the Arabic mainstream, whilst also casting a light on that which is often hidden from the public gaze-the lives of some gay and bisexual women. This long awaited critical translation provides the English reader access to a novel which deals candidly and positively with one of the most important and taboo issues of contemporary Arab society--(homo)sexuality. The novel is translated and introduced by Samar Habib (author of Female Homosexuality in the Middle East) with a foreword by Rebecca Beirne (editor of Televising Queer Women: A Reader)--both critical commentaries help the reader situate the novel within a dynamic historical framework and a broader LGBTIQ context. "This book provides a narrative that depicts everyday lives of lesbians in the Middle East, moving beyond seeing victims of homophobic laws, in order to explore their desires and the possibilities for living life outside societal parameters. I Am You is unique in that it is the first novel published in Arabic to truly take up lesbianism as an issue, and I would argue, a cause. For indeed, it is a highly political novel, questioning every prevailing societal belief about homosexuality, and contending that homosexuality is a natural phenomenon. As the

first text of its kind, I Am You will no doubt one day take its place as a lesbian literary classic, but, more importantly, it outs lesbianism in the Arab world (and specifically, in Lebanon), acting as survival literature, and perhaps, opening up a door for further lesbian representation in Arabic culture." - Dr. Rebecca Beirne, Author of Lesbians in Television and Text after the Millennium and editor of TelevisingQueer Women: A Reader

Toward a New Israel Jul 26 2020 This book represents an original interpretation of the state of Israel, a Jewish political renaissance in the modern era. It probes the meaning of Zionism in the historical context and examines critically the founding of the state, its underlying principle themes, and political orientation. At root, the analysis focuses on the secular ideological basis of Israel and the rejection, in 1948, of any search for an authentic projection of the new state as a philosophical continuation of Judaism. The book is organized primarily around the Jewish-Arab completion and conflict in the land of Israel, while the deeper philosophical and ideological topics provide a framework and context for Israel's collective political identity.
